

CONTENTS

- 1 **Research on the establishment of space environment test facility and security management strategy for large satellite system**
Jong-Min Im, Seong-Bin Lim, Hee-Kwang Eun, Ji-Seok Kim, and Min-Jun Kim
- 14 **Radio frequency attacks on open-source ground station**
Young Eun Kwon, Youngjoon Kim, Ji Hyuk Jung, Hyeongjun Choi,
and Ji Won Yoon
- 20 **Contractual considerations for space asset joint-development**
Il Seok Oh
- 29 **Analysis of operational trends and essential modeling factors for enhancing the utilization of low earth orbit satellites**
Du-hui Yun and Seok Teak Yun
- 45 **Global trends in commercial ground station technologies and space security strategies**
Myungjun Kim, Sunghyuck Lee, Jeongho Han, Junbeom Bang, Yongha Kim,
and Hojong Lee
- 62 **Recent trends in AI technology applications and related policies in the space security industry**
Hoonhee Lee, Dongwoo Shin, Seongin Hong, Joon-Min Choi,
and Gwanghyeok Ju
