

CONTENTS

- | | |
|----|---|
| 1 | A comprehensive survey on AI-based infrared satellite image analysis: From radiative principles to multi-task detection
Dongik Lee, Bomin Kim, Hyeonji Choi, and Sungho Kim |
| 13 | Evolution of AI-based change detection for low-to-medium resolution satellite imagery and design strategies for user-customized generalized platforms
Heein Yang and Daehee Kim |
| 22 | A foundational study on the development of space security professionals
Jungsik Um, Taehawn Cho, and Mika Lim |
| 29 | A study on data mining and fault prediction using long-term satellite telemetry
Dong-Hwan Yoon, Jiseung Ahn, Jingi Ju, Mincheol Shin, and Jeongyeol Choe |
| 36 | The peaceful use of outer space with domestic law on the space security law
Jong Hyun Hong |
| 43 | Security assessment of Internet-exposed satellite ground segments via non-intrusive reconnaissance
Hyeongjun Choi, Young Eun Kwon, and Ji Won Yoon |

Vol. 3 No. 1
June 2026
